UMISK ENCAMPMENT INSTALS NEW HEAD

GRAND LODGE OFFICER FROM
CITY VISITS TOWN FOR
CEREMONY

On Thursday evening last, Patrick D. Wilson, P.G.P., G.S., of Edmonton, visited town for the purpose of installing the newly elected officers of the Umisk Encampment, I.O.O.F., at their respective chairs for the ensuing term. He was assisted by past grand officers of the local lodge.

At the close of the ceremonies a splendid spread was done full justice to, before a number of the Chaivin patriarchs started their long trek home for a truly enjoyable evening with their Wainwright brothers.

The following are the new officers:
P.C.P.—Pat W. Bowen
G.P.—Pat R. Dunsmore
S.P.—Pat J. Sutherland
S.W.—Pat W. Carrell
J.W.—Pat P. E. Wiley
Scribe—Pat F. Morris
Treas.—Pat W. Adams
G.—Pat W. Petrie
1st W.—Pat W. Huntingford, P.C.P.
2nd W.—Pat H. Ward, Jr.
3rd W.—Pat P. Carrell
4th W.—Pat L. D'Albortson
L.S.—Pat A. Whinnell
O.S.—Pat G. Newman
1st G. of T.—Pat H. Lumsden
2nd G. of T.—Pat J. Miller

LOCAL NOTES

A hockey match is scheduled for Thursday (tomorrow) between the local and a team from Viking. As the Viking boys are making quite a clean-up this year, the match should prove an interesting encounter. Get out and root for the home boys.

—O—
Mrs Hart and her daughter Miss Edith were visitors to the city for a few days last week on business.

—O—
Miss Helen Tory who has been staying here for some time has again returned to her old position with the C.N. in Edmonton.

WONDERFUL ACHIEVEMENT RADIO SUPER STATION

On Thursday and Friday last, during the running of a 30-hour continuous radio programme, the American radio broadcast station K.S.L. at Salt Lake Utah, achieved an undoubted record for receiving telegrams, when over 57,000 messages were received in possibly the biggest contest ever staged of its kind. The dedication of the new super station was the cause and the effect meant the distribution of well over \$500,000 in prize awards, the first of which was a Whippet auto Alberta certainly shared well among the winners no less than eleven "lickers" being named among the "lickers." These were situated at Vegreville, Strathmore, Hillebrand, Drumheller, Craio, Stettler, Edmonton, Monitor, Coalspur, Calgary and Viking. Despite several telegrams from town, those of these got into the fortunate class.

RETAILERS SEEK NEW LEGISLATION

SEEKING TO ENLARGE SCOPE
OF PROV. SMALL
DEBTS ACT

EDMONTON—Legislation bearing on the interests and operations of storekeepers was discussed by representatives of the Alberta Retail Merchants Association that waited upon Attorney-General Lymburn. A. C. McKay, secretary of the association; A. T. Williams, assistant secretary; and S. O. Jones, for Saskatchewan made up the delegation.

Seek Amendments
Among the legislation desired from the merchants' point of view were amendments to the Magistrate's Small Debts Act providing for compulsory attendance of debtors, an enlargement of the power of the magistrates to go into the capacity for the payment of judgments by instalments.

Simplification of the procedure under the extra-judicial seizures are also asked for, with a reduction of the costs. The merchants would further like to have collection agencies bonded.

All these matters it was stated by Mr. Lymburn are receiving consideration by the government.

SLIGO U.F.A. LOCAL ELECT NEW OFFICERS

The annual general meeting of the Sligo local No. 209 U.F.A. was held on Saturday January 5th at the home of Mr. Gordon Graham with a fair attendance. The election of officers which was the big item on the agenda saw the following take office for the ensuing year:—A. Postans, pres.; J. W. vice-pres.; G. A. Bous, sec. The following are the directors of this local: Messrs W. Rowe, G. Graham, A. Woodyer, H. Lance, F. Ford and N. Garrioch.

Mrs Cunningham is here from Marsden on a visit to Mrs. W. Carrell.

FAMOUS HOSTELRY GOES INTO HISTORY

WALDORF-ASTORIA GIVES WAY
TO OFFICE BUILDING
SHORTLY

NEW YORK The Waldorf-Astoria is to pass. On the site of fifty-story of the building it to be erected. Every newspaper in the land has carried the story of the intended demolition of what is perhaps the best-known hotel on earth.

The Waldorf-Astoria by no stretch of the imagination could be considered part of the history of the history of life of New York but, in its thirty-five years of existence, it has been the scene of numerous dinners and balls staged for Catholic charities and has accommodated Catholic societies including members of the royalty, distinguished professional men and princes of the Church.

First among the functions staged in it was a charity concert for St. Mary's Free Hospital. According to old news paper accounts "The audience was the most brilliant that New York has ever seen gathered together—and for once interest did not centre in the fashionable people; they were absorbed in surroundings than which there are no where in the world any more beautiful and magnificent."

WAINWRIGHT IN OIL SPOTLIGHT

PRODUCTION OF 400 BBLs DAILY
NOW BY WAINWELL NO. 1
GREAT AID TO FIELD

Under the above caption a recent issue of the Manitoba Miner says that John L. Daugherty, oil operator of Winnipeg who has just returned from an inspection tour of the principal oil structures in Alberta, is authorizing for the statement that the Wainwright structure has reached the stage in its development now that it will demand the attention of the major oil operators with an intensive development program from the New Year.

Mr. Daugherty visited the Pike Lake district where a structure has been worked out by some of the Dominion geologists, also the Rosetown and Hershfeld district, where J. O. Williams is drilling at 2,030 feet at the present time. This hole encountered oil and gas at the 2,000 foot horizon and indications look extremely favorable for the structure on which the well is located.

Progress being made by the operator drilling on the Ribstone Creek anticline has been most encouraging and has convinced the oil operators that additional work will be highly remunerative for the operators holding leases in that area.

Watch Wainwright seems to be the byword of the large American oil corporations who are there now checking the area in detail and keeping track of the work being done by the independent companies. Production of 400 barrels per day is now obtained at the Wainwright No. 1 according to Mr. Daugherty, and is focussing the spotlight on Wainwright. This well is doing much to attract the interest of the outside oil companies, he declares. Mr. Daugherty who is managing field director for the Battle River Petroleum Syndicate, announced that the syndicate's program calls for the drilling of some thirty wells, and the development of over 20,000 acres of oil property it controls.

*** Some things only come once in a lifetime—being born and being buried are two of these; and building a real home is a third. Say if you saw the swell houses in our new plan book you would run the "d bus" another year and build a new home! Come in to the Atlas gate from the Avenue district to the annual U.F.W.A. convention

*** There is always good parking on "easy street." Make a special effort NOW to see that you are fully protected against fire. See Joe Welch about this, and he will arrange it!

MRS. ROD. MACLEOD DIES FROM PNEUMONIA

SAD DEATH OF BRIDE AFTER
ONLY THREE MONTHS'
RESIDENCE

There passed away on Friday last at the hospital, Mrs. Rod. MacLeod, beloved wife of Mr. Rod. MacLeod, of the Buffalo Park estate. The cause of death was pneumonia.

The deceased lady, who was in her 36th year, came to Wainwright from her home in Benside, Stornoway, Isle of Lewis, Scotland some three months ago, arriving here on October 3rd last. On October 25th, 1926 she was married to Mr. MacLeod and took up residence at the Wainwright gate at the Park.

Suffering from a severe cold for about a week, she was taken to the hospital, but although the causes of the pneumonia which set in were well checked, a weakened heart could not stand the strain put upon it, and she passed away as stated.

In addition to her sorrowing husband, she leaves to mourn three sisters and three brothers, these being Mrs. Flora Macdonald, of Stornoway; Mrs. J. MacCannan, of Glasgow; Mr. D. Munro, in Australia; Mr. J. A. Munro, in Chicago and Agnes and Alexander at the old home in Scotland.

THE FUNERAL

Was held on Monday last when the Rev. W. S. Brooker (after a short service at the residence) conducted the funeral service at St. Andrew's (Pres) church which was filled to overflowing. He spoke very pointedly to the loved mourners, and feelingly to the glorious hopes of the resurrection. Interest was at the Wainwright, where a large crowd witnessed the last and rites as conducted by the same reverend gentleman.

The pallbearers were Messrs T. Billing, J. S. Sutherland, E. Cameron, J. W. Stuart, J. Sutherland and E. Robertson, while Messrs J. S. Sutherland, the Gaelic Society, Edmonton, and Mrs. O. R. Hannah, of the Ladies' Aid of St. Andrew's church, spray; Mr. and Mrs. A. S. Sutherland, spray; Mr. and Mrs. T. Billing, spray; Mrs. and Mrs. J. S. Sutherland and Jessie, spray; Mr. and Mrs. J. W. Stuart and family, spray; Sorrowing Friends of Edmonton, spray; and others.

CARD OF THANKS

Mr. Rod. MacLeod wishes to express to all his kind friends and neighbors heartfelt thanks for the kindly attention and sympathy shown him in his sad bereavement, and also for the many and beautiful floral tokens.

GRAIN ESTIMATES SHOW DISPARITY

A disparity of more than 60,000,000 bushels in the estimated wheat production of Western Canada remains still between the figures issued by the Northwest Grain Dealers' Association on January 3, 1929, and the latest estimate of the federal government, issued Nov. 13, according to the latest crop report of the Sanford Evans Statistical Service of Winnipeg.

January 3, the Northwest Grain Dealers' Association issued a report stating that the Western wheat crop was 540,730,000 bushels. Compared with this is the report of the government, November 13, which placed the production of 179,598,000 bushels, a difference of 61,132,800 bushels.

LOCAL NOTES

*** People these days don't use lard on their bread. No they know better. A big load of suet from the Atlas yard will cost you very little, and will pack ice to keep the butter and cream sweet this season. Phone 57

Mr. Andy Carlson and Mrs. Clare Eyben Carlson who were married recently gave their wedding dance at Caron's hall last Friday evening. The music was supplied by the Caron orchestra. A very large crowd attended, and through the spokesman, Mr. C. H. Kent, extended their best wishes to the happy couple to which Mr. Carlson in a neat speech responded. A nice lunch was supplied to those present as well as other dainties.

CURLERS' OLD-TIMER DANCE POSTPONED

Owing to the state of the weather, which has set back the finishing of the new Foster garage on Main street, these premises will not be quite ready for Friday next, and therefore, the Old-Timers' Dance which was scheduled for that evening is being postponed until NEXT TUESDAY evening January 22nd. It is hoped this will inconvenience no one, for truly "a real good time will be had by all" on that date as assured.

ANNUAL MEETING OF WAIN. UNITED CHURCH

REPORTS SHOW OVER \$4,300.00
WAS RAISED BY THIS BODY
DURING YEAR

Owing possibly to the amount of sickness in town, only a fair attendance gathered at the United church on Monday evening for the annual congregational meeting, when the pastor Rev. N. W. Whitmore was appointed as chairman and Mrs. F. Stott as secretary.

After the opening of the meeting with religious exercises, the reports were called for, from the Sunday school, the organized girls' classes under Mrs. Cuthbertson and Mrs. Bowler, the boys under Messrs W. Stewart and E. Friedland, the W.M.S. and the Choir (Mrs. Steele), the Ladies' Aid (Mrs. Hackett), Greenhills (Mrs. D. McDougall), the Board of Stewards (Mrs. Washburn) and the Session.

There was evidence of activity and progress in every department and hearty appreciation accompanied the adoption of the various reports. In every organization a substantial cash balance gives impetus for the undertakings of this new year.

Among points noted in these reports are:—The mortgage on the church property has been reduced this year by over \$7000.00; this being accomplished by a splendid gift of \$500.00 from the L.A. and the balance from private subscriptions. The turnover of the funds of the Ladies' Aid during the year has amounted to no less than \$1158.00 which is an evidence of their activity and zeal. A sum of over \$300.00 was contributed towards the balance and Extension Fund of the church, while the monies handled by the Board of Stewards was over \$2200.00. The Greenhills assembly Board remitted nearly \$400.00 during the year, in addition to which the L.A. at that point have a sum of \$200.00 as the nucleus of a fund for an eventual church at that point.

Taken all in all, the various funds of the church raised during the past year have reached in the aggregate over \$4,300.00, and while figures are not worshipped, they surely do give tangible evidence of what Wainwright United church has been able to accomplish during 1928.

(Continued on page four)

WEDDING BELLS

PLAXTON—LEWIS
A very happy and propitious event occurred at the home of Mr. and Mrs. Henry Lewis of Battle Heights district, on January 3rd at two p.m., when their daughter Beth Cecile was united in marriage to Mr. Clarence A. Plaxton, son of Mr. and Mrs. W. Plaxton, of Gilt Edge. The ceremony being performed by the Rev. L. Wright of Irma.

The bride who is well and popularly known in the Wainwright and Clark Manor districts was robed in white satin and georgette and was given away by her father but was otherwise unattended. She was the recipient of many beautiful and useful presents. After partaking of the wedding banquet with its usual ceremonies the guests, who were the immediate relatives of the happy couple, accompanied them to Wainwright, where the newly-weds were entertained for a short honeymoon. Upon their return they will reside on the groom's farm near town.—Con.

TAYLOR—LYTTLE

At high noon on Sunday last, at the United church manse, Mr. E. W. Taylor and Miss Sadie E. Lyttle, both of Edgerton were united in holy matrimony by the pastor Rev. N. W. Whitmore. Miss D. Redmond and Mr. J. S. Taylor were supporting witnesses. The happy couple are in residence at the groom's farm north of Edgerton.

EUROPE KNOWS CANADA BETTER

SAYS THAT INVESTORS SEE THE
DOMINION AS WORTH
WHILE

"Every year there is a more intelligent conception of Canada in the minds of the people, not only of the British Isles, but of the European countries in general," said C. J. Smith, European vice-president of the Canadian National Railways, who is visiting Canada, for the first time in two years, to discuss matters with the Canadian National officials as well as with officers of the shipping organizations with which the Canadian National has its traffic connections. He will visit the company's territory both in Canada and in the United States.

Mr. Smith said it would surprise Canadian business men to learn the principal characteristics of Canada were now understood abroad. "The visit of Sir Henry Thornton to Europe during the past year brought Canada to the front as never before, and people at present are extremely sensible of the development, are having their effect on available for investment here."

"There is no chance of the interest in Canada diminishing. The activities at the leading British financial men, such as Lord Melchett and other leaders in mineral and industrial fields of growth in the North American continent, are having their effect of assuring the European investor that Canada is really worth while and is likely to become more so."

Speaking of the traffic and business outlook as between Canada and the British Isles and other European countries, Mr. Smith stated that the work of the Canadian National in developing both trade and travel, emigration and settlement, was being constantly extended over Europe. During last year, he said, the Canadian National had handled more new settlers from Western Canada than ever before there being an increase of 10 per cent over the figures for the preceding year.

"In addition to this growing emigration traffic, there is a constant growth in the freight handled by our system between Canada and Europe. In both directions and there is also a healthy growth in the tourist travel. The Canadian National is represented in virtually every European country to day, though in the matter of attempting to provide satisfactory settlers for the vacant lands of this dominion our efforts are chiefly confined to securing the best type of people generally and getting for Canada those immigrants who are likely to become good Canadian agriculturists."

The Canadian railways' Mr. Smith continued, "are considered models of efficiency in operation not only in Great Britain but in other European countries, several of which, including France, are preparing to send experts over here to study at first hand the principles followed in the management and operation of the Canadian system."

Conditions in Great Britain are improving, in Mr. Smith's opinion "While the program would appear some times to be rather slow," he said "there is nevertheless real progress, and the visitor to Britain cannot fail to be impressed by the work being carried on by governmental and other agencies to bring about improvement in conditions as they affect every resident of the British Isles."

The launching and placing in service of the five new vessels of the Canadian National Steamships for the Canada-West Indies trade development had aroused keen interest throughout Britain. Mr. Smith said it had been determined that Canada desired to develop facilities for the encouragement of her trade within the empire, and also that the Dominion was keen to take advantage of all opportunities offering for improving her position.

LOCAL NOTES

After being confined to the hospital for several days, Mr. D. Davison is now around again.

—O—
We are sorry to hear that Mr. A. C. Armstrong is on the sick list this time. Indeed about one half of our merchants are fighting severe colds.

—O—
Why don't a hat sting? Because they never have a chance. If you had a chance to try a load of our coal you would never burn any other kind. A big fresh stock just in. Try a load from the Atlas yard and be convinced Joe Welch, Phone 57.

—O—
At the annual meeting of the Fasschendale school district last Friday Mr. Bernard Craig was elected trustee to replace Mr. W. Johnson whose term has expired.

ALBERTA CATTLE SHIPPED TO JAPAN

Twenty head of choice registered Holstein cattle selected from a number of Alberta herds were loaded at Calgary and Edmonton on Thursday last for shipment to Vancouver and thence by the S.S. Melville of the American Line to Yokohama for delivery to the Japanese government. It is expected that these cattle will form the basis of improved dairy herds in Japan, will prove a forerunner of further similar shipments from this province to the Orient.

Mr. Geo. Petrie is under the weather these days with a severe cold.

CONNAUGHT CHAPTER INSTAL NEW OFFICERS

MRS. W. BRUNKER HEADS LADY
MASONIC LODGE FOR
YEAR 1929

The ancient ceremonial connected with the installation of the new officers of Connaught Chapter, O.E.S. for the year 1929, was very efficiently carried out on Thursday evening last in the Masonic temple by Mrs. N. S. Kenny, P.W.G.M. of that order, she being ably assisted by Mrs. J. Cuthbertson as marshal.

The following members were duly installed into their respective offices before the delightful lunch which was enjoyed by all present at the close of the proceedings:—

W.M.—Mrs. W. Brunker
A.M.—Mrs. A. Bean
W.P.—Bro. W. W. Yeager
A.P.—Bro. G. E. Harper
Sec.—Mrs. H. Clouston
Treas.—Mrs. J. Sutherland
Com.—Mrs. H. Cork
A.C.—Mrs. P. Cuthbertson
Chap.—Mrs. A. Yeager
Mar.—Mrs. M. Lally
Org.—Mrs. E. Turner
Adm.—Mrs. O. Wilson
Ruh.—Mrs. B. Davidson
Edith—Mrs. K. Hannah
Martha—Mrs. J. Billing
Elects.—Mrs. Jessie Sutherland
War.—Mrs. E. Wallace
Sen.—Mrs. F. Crowe

GET YOUR NEW CAR PLATES NOW

VEHICLES & HIGHWAY TRAFFIC
ACT STRINGENTLY
ENFORCED

The following citation is for the guidance of the public in respect to the Vehicles & Highway Traffic Act for the year 1929.

It is advisable to all car owners to make application for their license at earliest possible date as they can be obtained either locally or through application form from the Department. It will over come any obstacle which may arise, due to delay in this case.

License plates shall be firmly attached as required by the act to the front of the motor vehicle and one of the back thereof. Attention should be given each day to these number plates when the motor vehicle is in use, the same as any other necessity of the said vehicle. Complaints regarding loss and theft of number plates have been quite numerous in the past, and with a little attention in respect to same it can be reduced to a minimum.

It is again drawn to the attention of the public in regard to misuse of dealer number plates. The act is quite clear in this case, and shall be strictly enforced in regard to same. Section 21 of the Vehicles and Highway Traffic Act reads: "No person shall use any number plate issued under the provisions of the preceding section on any vehicle, except a vehicle which is: (a) kept by him exclusively for sale and not for hire or any other purpose; or (b) used in his business as a service car or otherwise and not as a private car."

In the transfer of number plates from one motor vehicle to another, it is often abused. The act makes it quite clear before same can be done that the transfer must be registered. Some do not realize the danger in not making the proper transfer as required by the act, thereby holding themselves liable to three separate charges under the act, which amounts to ten fold the amount charged for registration of transfer, and also adds the onus on the party in case of accident.

Owing to the increased number of motor vehicles used in the Province each year, the department is taking steps to enforce the act strictly enforced for the benefit of public safety.

FILLING OFFICIAL SEATS FOR TOWN

THREE COUNCILLORS, THREE
SCHOOL TRUSTEES & ONE
FOR HOSP. BOARD

As will be seen from a perusal of the advertising columns this week, the time is drawing near when the ratepayers will be called upon to elect a Mayor, three Councillors, three School Trustees and one Hospital Board Trustee; this owing to the expiry of the terms for which the present holders of the offices were elected.

So far as the Council is concerned the seats of Councillors Welch, Robinson and Morris (who recently resigned) will be vacant and the Mayorality is also open for election.

On the Wainwright School Board, the retiring members are Messrs. Prosser, Stuart and Wiley, while the seat of Mr. W. Knowles on the Hospital Board will also be open as he has served his elected period.

We might also at this time draw the attention of the ratepayers to the fact that if they do not have any kick as to the way in which the public affairs of these governing bodies have been handled during the past year their opportunity to air their views will appear at the annual town meeting, which is advertised to be held in the Council chamber at 8 p.m. on Monday, February 4th next.

LOCAL NOTES

—O—
We learn that our enterprising townsmen Mr. Arthur Dugre has secured two lots at Hardisty on which he is to have a modern garage erected early in the Spring. Progress Arthur, eh?

—O—
The derricks of the Hargal Oil, Emerald Oil and the Derrick Dome Oil and a new one just finished west of town all went "overboard" in the big wind storm last week. The constant vibration causes them to "walk off the foot blocks" and thus the loosened guy wires cannot keep them upright and they topple over.

LEGHORN LAYS AT 3 MOS. & 2 DAYS

During 1928, Alex Taylor's Hatchery, Winnipeg, Man. ran a competition with their customers to promote interest in poultry raising, giving prizes for the earliest laying pullet, the highest percentage of chicks raised; the best picture and results obtained.

Miss Agnes Curtin of Craik, Sask., is the winner of 100 baby chicks with a S.C. White Leghorn pullet laying at 3 months 2 days. A record of early laying Barred Rock pullet, 3 months 7 days, Mrs. W. Drader, Dunsmuir, Man. winner of 100 chicks. Raised 198 from 200 Brod-Lay Liv-A-Gro baby chicks received, F. S. Taylor, Hultoon Man. winner of 100 chicks. Best picture of Brod-Lay chicks, Mrs. W. Helms, Irricana, Alta., winner of 100 chicks. Winners of 50 Brod-Lay Liv-A-Gro baby chicks—Frank Colyer Port Arthur.

FARM INTEREST IN GOOD SEED

ADDITIONAL INSPECTION HEAD-
QUARTERS NOW OPENED AT
SASKATOON

CALGARY—Because of the large amount of frost damage during the crop growing season last year, Alberta farmers are taking a greatly increased interest in the quality of their seed for their 1929 crop.

This was the statement made by G. M. Stewart, district inspector of the Dominion seed branch who added that the number of seed samples received last month was the largest since the branch was established.

"Apparently farmers are realizing that the early frost damaged the germination of their cereals and they are taking steps right away to ascertain if their own seed will be satisfactory and if not, to procure other seed. This action is to be commended as officials of the inspection division realize that there will possibly be a shortage of good seed grain to meet requirements of next spring," he said.

Mr. Stewart said that in order to relieve the pressure on the Winnipeg inspection district a new inspection headquarters had been opened at Saskatoon, which would give service to all of Saskatchewan the Calgary office would therefore remain the only district headquarters serving two provinces, namely Alberta and British Columbia.

MEMORIES OF SACRIFICE

"DAWN"

A Herbert Wilson Production which will be shown at the theatre here on January 24, 25 and 26.

In the early days of 1914—and for several years before—Nurse Edith Cavell had been the head of the Nursing Institute in the Rue de la Culture, Brussels. It was a monument to her untiring energy no less than to her desire to do her trust for the sick and the suffering.

Perhaps the most cherished moment of the day was when she spent her hour with the children she loved and they looked upon her not as a stern grown-up but as a friend and playmate to whom they could run with their childish troubles.

It was not therefore surprising when one morning a youngster wearing a Uhlán helmet and armed with a wooden sword chased a smaller boy who wore a Belgian chasseur's cap that the latter should run into Nurse Cavell's private sitting-room where she was awaiting her breakfast.

She entered thoroughly into the spirit of the game; quickly she hid the little one behind the ample folds of her skirt then stood erect in time to greet the "Uhlán" who demanded to know where his "enemy" was.

"You had better search" was her reply and the youngster proceeded to do so. So well hidden was the other youngster that he failed to discover him.

Then came the war. And with it the occupation of Brussels. Many sought safety in flight. Nurse Cavell, realizing that this was the time when her services and those of her nurses would be most needed, freely offered the use of her hospital to Germany as well as Allied wounded and remained herself in charge.

Among her acquaintances was a widow, a Madame Rappard, who was a mere stripling was fighting in the

Belgian ranks. When the German tide rolled on, the boy, like a piece of human wreckage was left high and dry. With a companion he managed to escape the vigilance of the Germans but a sentry was killed. His companion was caught—and summarily shot. Jacques Rappard, hunted, homeless, starving, sought refuge in his mother's shop.

Nurse Cavell was inside making some purchases when the boy dashed in. Breathlessly he tells his mother the story. "If I'm caught" he sobs "they—they—they..." The mother's imagination can supply the rest of the dread sentence.

What is she to do? Nurse Cavell comes into the little sitting room, closing the door behind her. And at that moment a German billeting party arrives outside the shop!

The distracted mother hides her boy in a linen cupboard and returns to the sitting room, more dead than alive. In a half fainting condition she sees the German officer's shadow on the glass door. And as he enters overwrought she falls to the ground unconscious.

Nurse Cavell quickly secures her. "I'm billeting" the officer announces "How many can you take?" Nurse Cavell looks down at the unconscious figure, then back at him. "Four" she answers quickly and then goes on with her efforts to restore the widow to consciousness.

Four stalwart privates enter the shop. "Jacques cannot stay here, it is not safe" Nurse Cavell tells the widow softly. "I'll tell him that I'll come back a little while later and take him to my home."

While one of the German soldiers is sorting stuff in an armchair the other three, Nurse Cavell enters and takes Jacques with her to the hospital and there provides him with a peasant costume, buying him a uniform in the great store in her cellar.

Madame Rappard, torn with anxiety, is waiting for the German billeting party in her house. Suddenly she hears one of them explain that there is to be a house-to-house search for refugees. She hastily puts down the coffee pot and rushes off to Nurse Cavell.

The latter soothes her, and between them they hide Jacques in a small wine cellar leading off the main cellar. They pull and old dilapidated ward robe over the door to hide it.

The Germans search but find nothing. When they are gone Nurse Cavell tells the widow to go home, and that she will find a way out. She goes to see another good friend in Madame Pitou abroad the latter's barge at Malines.

Despite an outwardly aggressive exterior—and the cares of looking after a dull-witted husband—Madame Pitou has the courage of a lion. Her husband refuses to listen to Miss Cavell's suggestion that they shall secrete Jacques Rappard aboard the barge and so get him across the frontier. Madame Pitou not only agrees but when the boy comes aboard and the Germans as usual search the barge at the frontier, but her quick-wittedness she prevents them from continuing to search the hold where Jacques is hidden in a brandy cask.

Nurse Cavell has written a postcard—framed innocently, which was to be posted when the boy was safe. Madame Pitou is one of the Germans to post it for her.

While Madame Rappard is sobbing out her gratitude Nurse Cavell sees a vision of the hundreds of other homeless and starving refugees of whom Jacques has told her, and she determines to aid them.

From that sprang the organization which aided these human derelicts. With the aid of Madame Rappard, Madame Pitou and last but not least Madame Ada Bodart—who leads the refugees from Nurse Cavell's house to the trans—Nurse Cavell manages

to succour many a homeless soldier. But the German authorities are growing desperate because of the continued escape of refugees. Colonel Schultz, the chief of their military police, gets a severe warning from Von Saubersweig, the newly appointed Military Governor of the city.

"If you value your job, look to it," he warns the crestfallen Schultz. The latter goes back to his office and tries to puzzle out just how the escapes are being accomplished.

Then he remembers that, in the early days of the occupation, he had told the English Nurse Cavell that she would be expected to make herself responsible for the behaviour of her enemy patients—and had indignantly refused to act as gaur.

As the thought recurs to him, he starts up and accompanied by two of his men, searches her house. But Nurse Cavell when he is announced presses with her foot the bell push secreted beneath the carpet, warns the refugees in the big cellar below of danger, and they rush to the safety of the smaller cellar with the screening wardrobe so placed that no one would suspect that it covered a door.

Schultz searches but finds no one. Yet he feels sure that Nurse Cavell with her untrammelled air is hiding refugees. The danger passed, Nurse Cavell got all her refugees safely over the frontier and for a time no more came to the Rue de la Culture.

Then a British aviator brought down in flames, crashed from the wreckage of his machine, a burning cottage. The Belgian tenants—mothers and daughters—are terrified. To succour the aviator, meant death penalty.

The daughter goes for Nurse Cavell and the boy is taken to her hospital. A watching German A.P.M. sees the youngsters' nervous movements and goes straight to the operating theatre where Nurse Cavell is about to dress the boy's wounds.

He tears down the blanket covering the lad's torso—there are the wings of the R.F.C. At that moment the youngster's nervous movements and goes straight to the operating theatre where Nurse Cavell is about to dress the boy's wounds.

He tears down the blanket covering the lad's torso—there are the wings of the R.F.C. At that moment the youngster's nervous movements and goes straight to the operating theatre where Nurse Cavell is about to dress the boy's wounds.

In the meantime, turned and looks at Cavell, who smiles reassuringly. The German touched by the youth's pitiful air, and her courage, stiffness, draws himself to his full height and with a click of his heels turns and walks out of the burning machine. In the meantime, turned and looks at Cavell, who smiles reassuringly. INDIAN SIGN LANGUAGE

When Americans, Frenchmen, Italians and Chinese meet in Germany, they show their ignorance of each other's language by failing completely in their efforts to engage in conversation.

Hundreds of years ago, with no newspapers, books, schools or colleges, representatives of different Indian tribes in this country were able to converse intelligently through the medium of the Indian sign language—even though they did not understand a single word of each other's language.

The sign language is remarkably easy to learn. In fact, we make use of dozens of the signs constantly without realizing that they are old Indian signs. The crooked fore-finger beckoning the two-year old, is the Indian sign for "Come." A pointed fore-finger means "You" Height was expressed

ed by raising the right hand a certain distance from the ground—something that we often do unconsciously.

Boy Scouts are taking up this language from one end of the country to the other. Should you see a couple of uniformed chaps making rapid signs and laughing understandingly, do not take them for deaf mutes. They are merely talking in America's first language and demonstrating one more accomplishment of the Boy Scout personnel.

How does your label read?

SCHOOL AND NIGHT CLUBS CONTRAST IN COSTELLO FILM

Memories of school days are revived by the opening scenes of "Madonna of Avenue A," the latest Warner Bros. Vitaphone production starring Dolores Costello. The action takes place during commencement exercises at the fashionable Academy, a girls' school at which Miss Costello is a student. Pupils and their proud parents throng the assembly hall, and there is the inevitable speech by the principal of the school, sounding the praises of "her girls," and commenting on the glorious summer holidays which are about to begin.

These scenes constitute a triumph for the Vitaphone, as it records not only the speech of the characters, but a group of songs by a large chorus of girls. Never before, it is said, has such a large singing chorus been made a part of a talking picture, and the development simply serves to illustrate the perfection which is fast being attained by the Vitaphone.

"Madonna of Avenue A," contains more spoken dialogue than any other picture ever made, with the exception of those few which are 100% talking pictures.

Included in the cast supporting Miss Costello in this drama, much of which is steeped in the hectic atmosphere of a New York night club, are Grant Withers, Louise Dresser, William Russell, Otto Hoffman, Douglas Gerrard and Lee Moran. Michael Curtiz directed, and the scenario, based on an original story by Mark Canfield, is by Ray Doyle.

ALMA MEAT MARKET

In Five MILLION HOMES TONIGHT

There are times when all a mother's love can't soothe a fretful baby. No way of telling just what's wrong, yet something must be done. Castoria time! A few drops, and Baby has dropped off to sleep. Yet this marvelous means of quieting a restless infant is utterly harmless. There is not one ingredient but what all doctors know and approve, and would let you give your baby every day in the week. In fact Castoria is a purely vegetable product. Gas pains, constipation, even diarrhea can be dispelled in this same manner. Castoria is older than you are, but physicians still say "nothing better for babies." An old-fashioned remedy if you count the years, but parents are old-fashioned who still raise babies without its aid. And at least five million modern mothers keep it handy day and night, for twenty-five million babies were brought last year! Buy yours now; don't wait until you need it.

ZENITH TRI-MOTOR
MONOPLANE USED
IN "CONQUEST"

Those who have never seen the palatial interiors of such new airplanes as the New Fokker and Ford tri-motored monoplanes will have their curiosity satisfied by the South Pole flight scenes of the "quest." Warner Bros. production starring Jonie Blue and directed by Roy Del Ruth.

Two spectacular dashes into the storm and ice-wastes of the Antarctic region are made in a great tri-motored Zenith monoplane, built to capture the world's endurance record.

The Sieman-Halske motors were imported specially from Germany by the Ryan Aircraft Corporation. The wings measure 90 feet from tip to tip and are excellently designed for lifting heavy loads. The cabin is comfortably enclosed with twin seats and controls in front of the instrument board. The control apparatus is of the latest type with a steering wheel substituted for the more familiar "joy stick."

A gasoline tank on each side of the cabin fills the spare back to the radio and instrument room which is fitted with sending and receiving sets, charts, tables, solar compasses and all the instruments necessary to aerial navigation in the polar regions. Bunks and thermos food and drink compartments provide for the needs of the flyers. There is a front and a back door and a window on each side of the radio room. It is electrically lighted. A Pullman car rides no more easily than it, except when it encounters the terrific elements of the polar regions.

Resembling a large bowl, a cowl for radial air-cooled airplane motors cuts down wind resistance, helps assure proper functioning of the engine and increases the plane's speed, tests with an army pursuit ship have shown. Without the cowl, a test ship made 118 miles an hour with the propeller at 1,900 revolutions per minute, but with the cowl the same ship attained 137 miles an hour other factors being the same.

"KEENO" OFFERS EXCELLENT AID

Good Health is Enjoyed When This Medicine is Used Regularly

Every man, woman and child should use "KEENO," the splendid system regulator, blood purifier and body builder. Thousands of Canadian families use "KEENO" regularly and find it efficient in every manner it is recommended. Among those who praise "KEENO" is Mrs. Louise Daniels. "KEENO" is a wonderful medicine and Mrs. Daniels. "Before using this medicine I suffered from stomach trouble, had hardly any appetite and suffered from indigestion gas and bloated feeling after eating. I was also troubled with constipation, and was affected by severe headaches and would feel weak and worn out. "KEENO" has given me relief from all this and I recommend the medicine with sincere confidence and faith. "KEENO" is recommended to relieve stomach, liver, bowel and kidney ailments, as well as headaches, dizzy spells, constipation, indigestion, gas and stomach loss of appetite, nervousness, rheumatism, etc. It is a wonderful medicine and I recommend it to all who are suffering from any of these ailments." BUSINESS CONDITIONS IN CANADA IN 1928

To those who do not live in Canada and have no first hand knowledge of conditions in the past four years, the statistics of the gain in Canadian production within that period will constitute a basis for optimism as to the future of the country. Canada has a population of less than ten million scattered over an area somewhat larger than that of the United States. It is not to be understood that the statistics of expansion represent accomplishments which have been attained in spite of a very slight increase in population. Fertile lands are waiting for the plow, great mineral deposits lie ready for immediate development, the manufacturing and agricultural industries are growing and the railways and transportation facilities prerequisite to further expansion are already available. When the people of other countries realize the value of the rich resources which are ready for improvement, there will be an inflow of workers who will be in the rewards of the great expansion that lies ahead.

In 1924 the wheat harvest of Canada as a whole amounted to 262 million bushels and that for 1928 to 500 million bushels. Within these four years the area planted to the varied crops of the country was two million acres in excess of the acreage at the beginning of the period. The gross value of agricultural production in Canada is about two billion dollars a year. The discovery of types of wheat which will ripen quickly has greatly increased the land area available for this crop. More than a million acres of the total increase in wheat land was in the province of Alberta and further expansion is probable in the Peace River Valley of Alberta and British Columbia. The period has also witnessed a 600 thousands acre increase in the wheat acreage of Saskatchewan and a slight increase in that of British Columbia.

When the time approached for the harvesting of the record crop of 1928 the British and Canadian governments co-operated in bringing 6,500 harvesters from Great Britain to the farms of Western Canada. The success of this experiment makes it probable that it will be repeated.

The value of the metallic and non metallic minerals produced in Canada during the past four years in the months of 1928 was about \$105 million compared with \$84 million in 1924. Besides being the third country in the production of gold and an important source for copper, silver, lead and zinc Canada produces 90% of the world's supply of nickel and 95% of the total asbestos. Within the last three years there have been a number of outstanding mineral discoveries in the northern parts of Quebec, Ontario, Saskatchewan, Manitoba and Alberta. When the new mines in these areas begin producing, the rate of growth in the value of mineral production should be substantially greater than that shown during the period mentioned above. The present is a period of exploration and discovery but the recent finds have been of such outstanding importance that there is no question but what a great period of mining development lies just ahead.

NEW BUILDING

The character of the building in Canada during the last few years indicates that preparations are under way for further increase in production activity. In the first eleven months of 1928 the total volume of building contracts awarded in Canada amounted to 453 million dollars as compared with 247 million dollars in the corresponding months of 1924. The amount of money spent for bridges, warehouses, roads and streets and other engineer-

ing items increased from 5 million dollars during 1924 to 100 million in 1928; the value of the contracts awarded for industrial building increased by 300% and that for business building by 130%. These percentages contrast with a 56% increase in residential building. According to the statistics of McLean's Building Reports the greatest increase in city building this year has been in Toronto where the total value of the contracts awarded in 1928 amounted to 50 million dollars as compared with 25 million in 1927. There were ten month figures. There was more than 70% increase over 1927 in the value of the contracts awarded in each of the following cities: Halifax, Saint John, Sherbrooke, Hamilton, Fort William, Saskatoon, Regina, Calgary and Victoria. It is also encouraging to note that the value of contemplated new construction as derived from recent building permits and the fact that there are a number of large new projects about to be started would indicate that 1929 will be another good year for the Canadian building industry.

The growth in volume of manufacturing has been of even more importance than that in agriculture and mining. Although the statistics of the total value of manufacturing in 1928 will not be available for some little time, the fact that there has been an increase of over one million horsepower in the installed turbine capacity of the country and that the average amount of energy generated daily has doubled during the period, gives an indication of the advancement in this field. Low cost power continues to be an outstanding advantage for those manufacturing industries which locate in Canada.

MARITIME PROVINCES

Possibly the most satisfactory feature of the present healthy economic condition in Canada is that all parts of the country are sharing in the general prosperity. Though the change has not been as spectacular in the Maritime as in other parts of Canada yet the gain in this area has been substantial. There has been a rapid increase in the output of iron, steel and coal. The pending reorganization of the British Empire Steel Company will be an important step in Canadian manufacturing. Although large crops were harvested in the Lower Provinces the low price of potatoes substantially reduced farm revenue. The exceptionally large supply of potatoes in both Canada and the United States lowered the price to a point where there was very little profit for the farmer. The rise in the price of cod from \$6.50 to \$9.00 per quintal increased the fisherman's income for the year by about half a million dollars. There has been a growth of confidence in the prospects of the fishing industry and with the completion of the new cold storage plant at Halifax it is anticipated that Maritime fishermen will be able to sell large quantities of fresh fish both in Canada and abroad.

ONTARIO AND QUEBEC

In Ontario and Quebec there was a late spring and for a time poor crops seemed inevitable. During the summer however, the weather was exceptionally favourable and the harvest proved satisfactory. Ontario is the fact that mixed farming is more general than in other parts of Canada, the rise in the price of animal products was of most direct benefit to farmers in these two provinces.

Since about 80% of the manufacturing of Canada is carried on in Ontario and Quebec, an analysis of the employment situation in manufacturing constitutes a good basis for the understanding of business conditions in these provinces.

Every month in the past three years has witnessed an increase in Canadian employment as compared with the corresponding month of the preceding year. There was the employment index in 1924, the Canadian index tends to show that the total volume of employment in Canada is now about 20% higher than in the corresponding months of 1924. The employment index for manufacturing, which is a fairly accurate reflection of conditions in such cities as Montreal and Toronto, shows an improvement of 25% during this period. In comparison with this 25% increase in the volume of employment, there has been about a 15% increase in the index of the volume of manufacturing. While it is not safe to accept relationship as that existing between employment and production, the 25% increase in employment and the 15% increase in output gives a hint that there has been an increase in output of about 30% per employee. Whether or not the increase is as great as 30% there is reason to believe that the full time use of machinery and the growth in the amount of electric energy generated in the province of Ontario and Quebec has meant a substantial increase in efficiency.

THE PRAIRIE PROVINCES

At the beginning of the season, crop conditions throughout the Prairie Provinces were exceptionally favourable and they remained so during June, July and the early part of August. In the latter part of the month, however, there was a severe frost which was responsible for a heavy loss in grade and a substantial decrease in yield.

The research work which was started about two years ago by the Dominion Department of Agriculture with a view to combating the rust scourge or to producing a rust-resistant wheat is still progressing. It has been discovered that dusting with sulphur is effective in checking the disease. Experiments with sulphur dusting have been made in Southern Manitoba and what remains to be determined are the methods which are practicable from the viewpoint of cost. Twenty-six different forms of rust spores have been traced by the investigators and the "Reward" variety of seed has been found to be more resistant of stem rust than most of the other common varieties.

It is estimated that there are now 4,700 country elevators throughout the West having a capacity of approximately 156,000,000 bushels as against 1,437 last year. The storage capacity at the head of the Lakes has been increased during the year from 73,000,000 bushels to 86,000,000 bushels.

In this connection it is interesting to note the extent to which the Wheat Pools have increased their control of elevator capacity. In November, 1927 the Manitoba Pool controlled 57 elevators, the Saskatchewan Pool, 724, and the Alberta Pool 158; and at the end of November 1928, the Manitoba Pool controlled 143 elevators, the Saskatchewan Pool 967, and the Alberta Pool 207—a total increase of 478 elevators during the year. There are now in excess of 1,400 country elevators controlled by the Wheat Pools.

Receipts of cattle for the period from January 1 to October 31, 1928 inclusive show a decline over the same period last year, this supports the contention that North America is rapidly approaching the time when supplies of cattle will not meet the demand. Prices of stocker and feeder cattle during the past months have been most satisfactory from the view point of the producer, and large numbers of yearlings and calves have been marketed meeting with a good demand. Owing to a premature feeling that an acute shortage of cattle existed prices during the summer and early fall of 1928 were disproportionately high and since prices reaction resulted. Statistics from the livestock was about 400,000 less than the number in June 1927. In this connection it is interesting to note that purchasers from the United States have been buying beef and dairy stock in all parts of Canada in anticipation of the growing need for cattle in that country.

There has been a remarkable increase in mixed farming in the irrigation belt of Southern Alberta. A large amount of fruit, such as plums, crab apples, cherries, strawberries, raspberries, etc., is now being planted on orchards of these farms and the older orchards are giving an excellent yield. Alfalfa and alfalfa seed are becoming an increasingly important crop. Near Lethbridge, the northern irrigation district, dairying and hog and poultry raising were reported to have increased 100% during the past year.

Few Canadians realize that Alberta contains more than 14% of the world's coal reserves, or 87% of the coal reserves of Canada. During the past year, between 50 and 60,000 tons of coal from Alberta were moved into Ontario and this experiment is to be continued during the next two years. Reports from the coal dealers in Ontario indicate that coal from Lethbridge fields is giving wide satisfaction, and that it can be sold in competition with the hard coal imported from the United States. There has also been an increasing demand for Alberta coal from the Prairie Provinces.

It is estimated that 400,000 barrels of crude naptha and 80,000 barrels of light crude oil were produced at the Turner Valley field. At the present time approximately 1,000 men are being employed at drilling and other work in the Turner Valley. Besides this, wells in the Wainwright, Ribstone and Skiff fields are making substantial contributions to the total output, and there are thirty-nine other wells now being drilled. Unfortunately only a comparatively small amount of the natural gas produced is being utilized but this feature is receiving the attention of both the Dominion and Provincial Governments.

All lines of wholesale trade are reported to have shown a very satisfactory increase in the volume of the sales as compared with last year. This improvement is largely attributable to the better crop conditions throughout the Prairie Provinces and the fact that stocks of country merchants were very low. Hardware and electrical supplies report an increase of 10 to 30%; heavy hardware 20%; dry goods 10 to 15%; groceries 10%; mining machinery 25%; boots, shoes etc 10%; auto equipment 30%; lumber and builders' supplies 20%. Automobile distributors report a reasonably good season, with sales slightly high-

er than last year. The increase in the sales of the implement dealers has been substantial.

BRITISH COLUMBIA

Weather conditions throughout the province were satisfactory during the year, no damaging frosts of consequence occurred, and good weather during the fall permitted harvesting to be carried out in good order. The strawberry, tomato and onion crops were excellent. One of the largest apple crops in the history of the province has been disposed of for about 4½ million dollars. The total crop amounted to more than 4,000,000 boxes. On the whole, there has been a steady expansion in agricultural production during the past two years.

There are no unusual stocks of sockeye, and only about 350,000 cases of other grades still in the packers' hands. It will be noted that the total pack this year is approximately 50% higher than last year; the chief increase was in pinkies, while the sockeye catch shows a reduction of some 100,000 cases. The packing of herring is still going on and the catch has been considerably ahead of last year. The fall fishing in November 26th, 1928, totalled 29,000 tons as compared with 22,000 tons in 1927, and 8,000 tons in 1926. Twenty-seven million pounds of halibut were handled at Prince Rupert during the season as compared with twenty-five million pounds in 1927.

Conditions in the lumber industry have shown a decided improvement this year. The general tone has been much better than at any time since 1923. Prices have strengthened and are ruling about \$2 to \$2.50 per thousand above the average prices for last year. This is the first long period of good conditions the industry has enjoyed for some time, and the majority of mill men are of the opinion that a fair degree of prosperity is in store for the coming year. The export trade has been steadily increasing; shipments to Japan this season reaching a new high record. Regular business is being booked from South Africa, New Zealand, and the British West Indies. It is expected that there will be a good demand from the Prairies in the spring.

Shingle manufactures have experienced a very satisfactory year. The associated mills have been freely it is thought that money expended in that direction has had good results. There has been a consistent surplus of orders over stock-on-hand and prices have been steadily rising throughout the year.

The monetary value of mineral production in 1928 is estimated at \$62,000,000. The production of copper is estimated at approximately 100,000,000 pounds; and lead, 300,000,000 pounds.

Wholesale and retail trade have been good throughout the year. Hard ware sales were excellent, owing to the building programme. Although there have been complaints in the larger centres respecting competition from departmental and chain stores, other merchants appear to be receiving a good share of the trade.

The volume of the tourist traffic has exceeded all previous years. In the first ten months of 1928, 91,000 (Continued on page 7)

HOW THE CONNOISSEUR JUDGES SOLID SILVER

Since your silver, if solid will endure not only through your own lifetime but will not want to select it impulsively. Probably no other purchase which you will ever make should receive as much careful thought. In making your selection, you must guard against choosing a pattern of which you will tire, or which, though perhaps temporarily fashionable may in time go out of fashion. What you really desire in silver of which you will always be proud and which will permanently exemplify your good taste and soundness of judgment.

To achieve such a desire, it is essential that you take the attitude of the connoisseur—indeed, that you actually become a connoisseur yourself, for connoisseurship alone can determine what is fundamentally good in design and workmanship, what is genuine and what is imitation what is beautiful and what is merely fashionable.

Let me see, then, what facts you need to make yourself a connoisseur. First, you will need to know something about "style" for style in solid silver design is the spirit of the precious metal touched to life by the magic of the artist.

Style in the artistic sense, has little to do with fashion. Fashion is fickle and temporary. Solid silver is permanent, and if it is to be also a permanent source of pleasure and pride its design must depend upon more than mere fashion.

There has been several great style periods in art. Each developed characteristic forms in architecture, furniture and silver which the connoisseur who has studied them can quickly distinguish.

The connoisseur knows why many years are required to build a reputation in art. Each developed characteristic which involves the employment of so much human artistry.

He knows that designs which perhaps temporarily fashionable, may be artistically bad. He knows that imperfections in workmanship may be hidden for a period. He knows that the amount of silver may be skimped so that it will be scarcely noticed. So reputation—which is simply another word to express reliability and consistency of high standards—is important to him.

This reputation has been built upon artistry, craftsmanship, honesty and fair dealing. To owners of silver, it has meant and will always mean, permanent beauty of patterns, exquisite finish, full weight of silver, sound value.

CONTINUATION OF Annual Meeting

(Continued from page 1)

The chairman, in giving more intimate details of the church's life and speaking on behalf of the Session, expressed the gratification all felt at the faithful work of so many in the various departments.

To replace that retiring members of the Board of Stewards, Mrs. R. M. Durrant, and Messrs J. W. Daugherty and D. S. Kyle were elected to seats on that body.

The meeting dispersed with the doxology after refreshments had been served by the ladies.

ALBERTA LEADING IN LAND SALES

Alberta holds leading place among the western provinces in the land sales made by the Canadian Pacific Railway during the past year, nearly 60 per cent of the prairie total of 609,464 acres being in this province, it is stated by officials of the company. A gain of 50 per cent is shown compared with the previous year when 427,921 acres were disposed of. The volume in 1928 was the highest in any year since 1921, while a large percentage of the sales represented cash transactions. The majority of the Alberta sales occurred in the Lloydminster district and in the territory opened up by the new Cuthbert-Whitford line which has recently been completed in to Edmonton.

ALBERTA DAIRY POOL EXPECTS BIG SUCCESS

EDMONTON—Gratifying results from the operations of the Alberta Dairy Pool were reported at a meeting of its central board held at the Parliament buildings with L. B. Hart as chairman and J. R. Love secretary. The pool began to function in May and has therefore not yet had a full year, but the prospects for the future development of its business were declared to be distinctly encouraging. The meeting of the board was for the purpose of drawing up a report on the operations of the pool to be presented at the coming convention of the U.F.A., that body having taken an active and parental interest in the Alberta Dairying industry.

TIME TO THINK ABOUT SEED GRAIN

(Experimental Farms Note)

While admitting the importance of high fertility and good cultivation as essential for a good seed-bed, let us not forget the importance of sowing good sound seed, pure as to variety free from weed seeds, of high vitality and which has been treated for smut.

The time never was more opportune or more ripe for the necessity of sowing pure seed than it is today.

With the ever-increasing weed problem, and the multiplicity of varieties that are on the market, the time is at hand when we must sow pure seed if we expect to reap the highest returns from our farms.

The wideawake farmer does not wait until the last minute to prepare and clean his seed, and will always be found ready when seedling time arrives, to sow seed that has been cleaned, of good germination and which has been treated for smut.

The practice of the Morden Experimental Station in regard to seed grain is to clean all grain intended for seed purposes shortly after freeze up, and to forward two-pound samples to the Dominion Seed Branch, Wpg., for grading and germination test. The Seed Branch, Winnipeg, will test samples of grain from the past seasons' crop received before January 1. Free of charge. Too few farmers avail themselves of this opportunity.

With the long winter days at hand, when the farmer has ample time to spare, why not crank the little gas engine, start the fanning mill going, get the seed grain ready, and be prepared for the big rush in the spring.

For those farmers who are intending purchasing seed grain, now is the time to get busy. Don't delay, but secure your seed early, then you will have no worries about seed grain when spring opens up.

In a seed grain survey made in Manitoba, one farmer was sowing seed supposed to be Marquis, but upon analysis, only 60 per cent was Marquis, while the other 40 per cent consisted of weed seeds and other varieties of grain.

We cannot hope to produce grain that will maintain our high standards on world markets, if more attention is not given to the seed we sow.

Have you ever worked with sealing wax? It is, I think a fascinating thing to do and may result in many attractive bits of handwork. The only utensils necessary are sticks of sealing wax in the desired colors, a gas burn or lighted candle in which to heat them and an ice pick or a small knife blade.

Stationery, place cards picture frames, lamp shades, lamp bases and vases are but a few of the things which may be decorated by anyone. I have seen fine screens with designs worked out with the wax and even creperies with the borders of it. Charming motifs may be applied to otherwise plain book covers, too.

Care Must be taken

The essential thing in working with wax is to melt it slowly and to a not too liquid state. It must be soft enough to spread easily but not so soft that it will drip or too much of it will be applied at one time. More may always be added but it is difficult to remove an extra amount. Place just a little on the article and work it into the wax with the point of the knife and then add more where necessary.

The motifs chosen may be ordinary embroidery patterns and be stamped or sketched lightly on the material. As you become more expert no pattern will be needed except perhaps for large articles.

The effect produced with sealing wax designs is unusually attractive. And, because you have done it there will be an individuality about the work which you cannot buy.

(Copyright, 1928, by The Bonnet-Brown Corporation, Chicago)

DO YOU KNOW THAT:

1 A few slices or dried orange peel kept in the teapot, when not in use will lend a delightful flavor to the tea?

2 If soup is salted too much while cooking if a damp cloth is placed over the top of the kettle the salt will evaporate and cling to it?

3 After a large tin or jar of olives has been opened a layer of olive oil to cover the brine will preserve the olives indefinitely without the objectionable white scum which usually forms?

4 Time may be saved in preparing jammin for pies if—instead of steaming it—a hole is cut in the top, the seeds removed the top replaced and it is set in the oven to bake and when tender the inside may be scraped out easily is not soggy and is ready for immediate use?

5 Brown sugar will keep moist and soft and can be handled the same as other sugars if it is kept in the ice chest?

A Sour
Stomach

In the same time it takes a dose of soda to bring a little temporary relief of gas and sour stomach, Phillips Milk of Magnesia has actually completely checked and the digestive organs all transpire. Once you have tried this form of relief you will cease to worry about your diet and experience a new freedom in eating.

This pleasant preparation is just a good for children, too. Use it whenever coated tongue or fetid breath signals need of a sweeter. Physicians will tell you that every spoonful of Phillips Milk of Magnesia neutralizes many times its volume in acid. Get the genuine, the name Phillips is important. Imitation is not the same!

HELP THE STAR

TO HELP YOU!

ditions as they have arisen during the past ten years and the fond hopes for a still brighter future—I hope I am not boasting when I say The Star is a good weekly paper. At least I think so by certain individuals who are in a good position to pass judgment, although they may have made the statement with deference for the feeling of the editor.

The Star owes what measure of success it enjoys to the support given by its advertisers and neighboring districts.

They like to read the news and the ads, they come every year to renew their subscriptions, and I appreciate their support.

Publishing a weekly newspaper is no sinecure. It involves a lot of hard work, long hours and a hectic scramble at the last minute to get the paper off the press and into the hands of its readers on time—and occasionally, when something goes wrong, it fails to appear on time (which has only happened once in 13 years).

But the editor and staff do their best. Sometimes the paper is not very bright. Interesting items have been overlooked; complete details of a story may be lacking, and the paper is not as good as it would be had the staff more time to devote to it.

But remember this—it is only with the help of its readers that a paper can issue a newsy sheet. If you know a bit of news that would be of interest to others, send it in or tell the editor. Personal items, crop reports, work of community organizations and social clubs, church and Sunday school items, sports, anything and everything that happens—it's all news as reported in the Calgary Herald. So give it to the editor and it will go into print to help make a bigger and better paper. Your assistance will be appreciated and a better paper means a better community advertisement.

THE EDITOR.

COUNTRY IS

CLOSING UP

The new spirit of robust optimism which is apparent everywhere in the Dominion is reflected in an interesting statement by W. M. Birks of Montreal, president of the Canadian Chamber of Commerce. He lays emphasis on the growth of national sentiment and the decline of sectionalism as reported in the Calgary Herald.

He finds a growing community of interest between the east and west and he refers to the growing industrialism of the west. As long as the three prairie provinces were devoted solely to agricultural pursuits there could be little sympathy with the viewpoint of the industrial east. Now that the west is embarking strongly in manufacturing enterprises there is a great tendency to view tariff and trade conditions from the rational rather than the purely parochial standpoint.

"Suffusing" which the commercial situation," Mr. Birks declares, "is the growing coalescence of our Canadian people and their same spirit of optimism. We are coming to realize that east, centre or west, we are all Canadians. The continued advance of commercial aviation will contribute the more to this end. In three trips to the Pacific coast these last twelve months and in my travels to the Maritime provinces, I am convinced that Canadianizing symptoms are everywhere in evidence. Agriculture is not looking so askance at industry, and the economic interest are coming together with good will and understanding, the Canadian Chamber of Commerce believes in this co-ordinating process and covets the amplification of a great or Canadian consciousness sublimated by a pervasive British outlook."

In carrying out this programme the Canadian boards of trade will hold their annual convention in Calgary and Edmonton next summer. This will be followed by an excursion into the Peace River country. The eyes of the whole country are on Alberta. Its remarkable development is attracting attention from coast to coast and the visit of leading business men from all over the Dominion will do much to attract capital for investment in the province.

Hard seats at football or baseball games hold no terrors for the person

equipped with a small pneumatic cushion now on the market. It can be blown up in a few seconds and when deflated fits in the coat or trousers pocket.

LETTERS TO
THE EDITOR

INVITED TO

VISIT UNIVERSITY

Dear Sir—It came to my mind that many readers of your valuable paper will probably come to Edmonton when the United Farmer's Association's convention and the Provincial Seed Fair is held here, during the week of January 17th to 22nd. I feel that most of the farmers would find it both interesting and profitable to plan a visit to the University of Alberta at this time.

A new laboratory and two large greenhouses have recently been erected for the purpose of studying root-rot, and other diseases of our grain crops. This work is being done jointly by the Dominion Department of

Agriculture, and the field Crops Department of the University of Alberta. We are only just beginning to realize the damage done by rust, root-rot and other diseases in our Western crop areas, and it well becomes our intelligent farmers to come and see what is being done, both by the Dominion and Provincial authorities to combat the ill effect of rust, root-rot and other plant diseases that infest our western grain fields.

To those who know and appreciate good stock, a visit to the live stock barns, located on the University Farm will be time very well spent. We read with proper pride what Alberta has done at the biggest live stock shows with these cattle exhibited by the University. Not many of us can visit the big eastern shows but lots of us can, and should see this stock, that holds its own with the best on this continent.

Winter is supposed to be the farmer's slack time, and even if it meant an extra day in town, United Farmer's Association delegates and interested growers, who plan a visit to the University of Alberta, will find a pleasant and profitable relaxation from the hum-drum existence so common to a lot of farmers.

Yours very truly

A. R. ELVIDGE

OIL PRODUCTION

SETS NEW FIGURE

Establishing a new mark in the history of the province, Alberta petroleum production in 1928 reached the imposing total of 486,318 barrels, according to figures published during the past week. This is an increase of 46.4 per cent over the 1927 production of 332,135 barrels. Wells in the Turner Valley field established a high mark in the month of December with a production of 48,505 barrels. The increase over the 39,709 barrels recorded in November is made up largely by the output from the Okalta No. 1 well. The total production in the province for 1928 was made up as follows:

Turner Valley, crude asphalt, 374,795 barrels; Turner Valley, crude oil, 104,604 barrels; and Wainwright field crude oil, 6,919 barrels.

CONVENTION CENTRE.

Edmonton, during the coming week will be the scene of a number of gatherings of importance to residents of rural sections of the province. It is expected that over 500 delegates and possibly as many visitors will attend the annual U.F.A. Convention to be held in the First Presbyterian Church. Many of the delegates and others interested in the production of good seed grain will also attend the Provincial Seed Fair and the annual meetings of the Alberta Seed Growers' Association which will be held during the same week in the Chalmers Block and the Hudson's Bay Building respectively.

ELECTED IN NOVEMBER, TAKES
OFFICE IN MARCH, WHY?

Why does a modern nation like the United States elect its President in November and have him take office several months later?

Probably it is because we find it so difficult to break away from old laws that were made to take care of exist-

ing conditions of the time.

Before the days of airplanes, automobiles, railroads or even steamships, it took weeks for representatives from the most distant sections of the United States to report at Washington for their executive duties. Today, the Californian could report in two or three days via the air route, or in five or six days by taking a train . . . yet we still give him several months

will be commemorated in the names of stations established on the new 25 mile railway extension from Wembley to Hythe. The first of these is Albright named in honor of W. D. Albright, Superintendent of the Dominion Experimental Station at Beaver Lodge. The second is Hualien which will suggest the name of Hugh Allen, M.L.A. for Peace River.

Edmonton reports thick smooths fed and watered, at \$8.90 with select \$9.50.

SHEEP

Edmonton reports market as showing no material changes. Yearlings \$8@9; ewes \$4@7 and; lambs \$10@11.50.

GRAIN

Trading at Winnipeg on Wednesday was of good volume with prices from 1/4c to 1c higher. Offerings were large but orders from seaboard helped the situation. Liverpool cables were strong.

CREAM — BUTTER — MILK — CREAM — Market steady after recent decline. Receipts increasing. Special 30c; first 37; second 34c at centralizers and country points. CREAMERY BUTTER — Sales holding up well with trade anticipating slight surplus in near future. Prices

steady at No. 1 cartons 44c; No. 2 42c. No. 1 prime 43c; No. 2 41c. DAIRY BUTTER — Very little being handled as most farmers are shipping cream. Demand for fancy table but little doing in other grades. Price unchanged at fancy table 34@37 No. 1 31@33c. No. 2 26@27c MILK — Receipts easily take care of demand. Prices unchanged.

POULTRY — EGGS

POULTRY — Prices are steady. Fowl live No. 1 over 4 lbs 12c; under 4 lbs 10c; chicken 12c; No. 2 9c; roosters 6c. Turkeys, live No. 1 over 11 lbs 17@18c. No. 1, 9-11 lbs 15@16c. 6-9 lbs 12@13c. Old toms 12@13c. No. 2 over 10 lbs 10@11c. No. 2 under 10 lbs 8@9c. Turkeys dressed No. 1 over 12 lbs 25@26c; 10-12 lbs 23@24c; 8-10 lbs 21@22c; 6-8 lbs 17@18c; old toms 17@18c. No. 2 over 10 lbs 16@17c; under 10 lbs 13@14c. Ducks live No. 1 13c; dressed No. 1 15c. Geese live No. 1 9c; dressed No. 1 14c. EGGS — Receipts increasing steadily and of good size and quality. Market weaker as demand is not active. Hardly any drop in prices. Extras 32@40c; firsts 30@37c; seconds 24@28c. Storage stocks draggy and hard to dispose of; no reliable quotations exist.

POTATOES

Market weak as there is practically no demand. Quotation of \$15@17 per ton. Wholesale hotels and restaurants well supplied. Housewives only buyers and in small lots. Outside markets do not appear any better if as good.

HAY — GREENFEED — OATS

HAY — Liberal offerings from country points but no improvement in demand. Prices holding up well despite

condition of market. Upland at \$9@10; timothy \$12 per ton, country point GREENFEED — Little demand owing to it having been touched by frost. Receipts light. Quoted at \$9@10 delivered WED. OATS — Market held in fairly strong at 40@45c.

Health Service

of the
**CANADIAN
MEDICAL ASSOCIATION**
A HEALTH REVIEW

At the beginning of each year it is customary in many fields of human endeavour, to review the twelve months which have passed, to take stock as it were and to consider whether or not the year has been a profitable one. It is upon the success and failures of the past years we base our plans for the future.

It is, therefore, rather an appropriate time for us to review the health conditions of our families as they were during the past year. First of all we should consider whether or not we have taken steps which would protect us from certain diseases. Vaccination does prevent small-pox. Have you allowed yourself or your children to be exposed to this disease through failure to use vaccination as a means of protection? Diphtheria can be prevented by diphtheria immunization. Have you allowed this disease to continue as a menace to the very lives of your children by your failure to have them immunized?

Safe water and pure milk are fundamental needs. Contaminated water and dirty milk are still the cause of much sickness and many deaths. Have you seen to it that the water you and your family drink and the milk that you use are pure, or do you live with the dangers of impure water and milk hanging over you?

Have you given attention to your home? Are your windows screened to keep out flies? Do the windows open to allow for proper ventilation? Does the sunshine get into your rooms?

A much larger measure of health is within the grasp of most of us, but we must make the necessary effort to win it. If you delayed last year, if you were careless in health matters start off this year by doing the things you should do in order to avoid certain diseases and to lead healthier lives.

Questions concerning Health addressed to the Canadian Medical Association, 194 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

The Farmer Of The Future

I am going to draw a hasty sketch of what I think the farmer of tomorrow may look like. All I am pretending to do is to make a sort of impressionistic sketch a cubist portrait, as it were, and perhaps even then if the farmer of tomorrow should ever see this picture of mine, he may say that I am only a bungling cartoonist and throw the whole sketch away. Well, no matter we have mixed our colors—let's spread the paint.

1 The farmer of tomorrow will look much like the farmer of today much more so than the farmer of today looks like the farmer of yesterday.

2 He will still be an individualist but his individualism will be toned down by a larger business and social association with his fellows.

3 He will be more intelligent, better educated, and he will make more complete and effective use of the scientific information that is available.

4 He will be a better business man. He will keep books. He will know costs. He will study the statistical crop situation and be more guided by the rules of good business management in his production.

5 He will reduce his production costs by an adjustment of the size of his plant and the organization of his enterprises. By so doing, he will approach the ideal of the right man growing the right crop in the right amount by the right method on the right land.

6 He will have a better system of marketing either co-operative or otherwise. The interest of the consumer and the farmers are identical in this. If the farmer puts his house in order as an effective producer the inefficient wasteful extravagant methods of handling must go. It is possible to give the farmer a better profit and at the same time reduce the cost to the consumer. Economic necessity will bring about both.

7 He will make a larger use of machinery. He will use his hands less, his brains more but he will still be a worker in his own field.

8 He will produce a higher quality product to meet the demands of his own and industrial America's increasing standard of living.

9 He will be more resourceful, less dependent on the city for his amusement and entertainment. He will have a rural culture of his own that is not a cheap imitation of the city.

10 He will live in a better home

with more conveniences and more comforts. He will apply power to the home as he has to the farm and the farm woman of tomorrow will relieve the husband of the picture of the farmer of today.

11 He will perhaps continue to dwell apart on his own farm but good roads, radio, motion picture in his home, the enlarged use of the automobile and the airplane will so reduce his isolation as to make for a more complete socialization of the country.

12 He will have better schools in the open country. His children will receive proper vocational guidance and training in these schools. The new country high school will train for life rather than prepare for college, and it will not educate away from the farm.

13 He will be a better neighbor because his higher intelligence and increased co-operation will make him more tolerant and more charitable.

14 He will be more public spirited less niggardly, more interested in the safety of farm, of home and of community and the establishment of those intangible values that may be passed down as an inheritance to his children and perpetuated but are not so much convertible into cash.

15 He will be better organized and make more effective use of his organizations and take an enlarged place in the nation's life.

16 He will be, I hope still consumed by a "glorious discontent."

We might dash on a few more colors but enough is done to show what the farmer of tomorrow to my mind is to be like. He is like the farmer of today or rather, he will be the full development of the new farmer whose outlines we are only just beginning to see. As a matter of fact, there is no "farmer of today" What we see as such is only a few rapid pictures on the film and when the film has run its length—tomorrow will be today and today will be yesterday, and the new farmer will have evolved. The transition from labor and ignorance to power and intelligence will be complete and he will no longer need to worry about his tomorrow. From an address by W. A. Lloyd of the U.S. Department of Agriculture.

RED CROSS NURSERY

U.F.A. CONVENTION

As in former years the Red Cross Society, on the invitation of the U.F.A. will operate a Nursery for babies and children who accompany their parents to the Annual Convention on January 15th.

Upstairs in the large and airy room of the First Presbyterian Church, allotted to the Red Cross for this purpose will be found small cots and other comforts for the little people to whom lectures at a Convention are a bore indeed. A corner of the nursery is set aside for the older children, who will find playthings and picture books to while away the hours, while Mother is at the U.F.W.A. downstairs or Father is joining in the discussion with the men in their sessions.

A table of health literature for the distribution of which the Red Cross is famous all over Alberta, will be shown the attendant being Mrs. M. H. Conquest known to many listeners as the Radio Lady of the Red Cross Friendly Hour C.J.C.A.

Many country delegates have written in their desire to meet the Radio Lady in person, and are looking forward to this opportunity to do so at the Red Cross Nursery.

It is hoped the many families attending the U.F.A. Convention will make full use of the Nursery, and if possible get better acquainted with the many various services which Red Cross continues to render to the people of the province in times of peace a fuller knowledge of which is necessary in many country districts unaware of the vast humanitarian program of the Alberta Division.

For installation inside or outside the windshield a wiper is supplied with electric current from the ignition-switch terminal of the car and by warming the glass helps in the removal of sleet and mist. It is easily connected and when not needed during the warm months, is quickly detached from the circuit. The current is automatically switched off when ever the motor is stopped.

Smilin' Charlie Says

There's one thing about it — you'll never do big things watchin' a steam shovel at work!

How to Play BRIDGE

Series 1928-29 by
Wynne Ferguson
Author of "PRACTICAL AUCTION BRIDGE"

Copyright 1928, by Wynne, Jr.

ARTICLE No. 3

Players generally seem to have the opinion that four-card suits are small cards which become trick takers as a result of various combinations of length in suits. For this reason, before you start to make bids on suits of only four cards, remember that such a suit will average to produce one trick less than the same holdings in a five-card suit.

For example, a four-card suit headed by the Ace-King will average three tricks—two for the high cards and one for the low cards. A suit of five cards headed by the Ace-King, however, will average to produce four tricks—two for the Ace-King and two for the small cards.

In other words, there are two kinds

of trick takers in Auction: high cards, such as Ace and King; and small cards which become trick takers as a result of various combinations of length in suits. For this reason, before you start to make bids on suits of only four cards, remember that such a suit will average to produce one trick less than the same holdings in a five-card suit.

For example, with the following four-card suit holdings, you should hold the number of tricks specified in plain (side) suit to make the four-card suit a justifiable original bid.

Four-Card Suit Holding	Strength in Plain Suit Must be High Cards
A, Q, 7, 6	One Trick
K, Q, 10, 4	One Trick
K, Q, 4, 2	One Trick and One-half
A, K, 3, 2	One-half Trick

The above holdings are about the only justifiable original four-card suits that should be bid and then only as dealer or second hand. If you will study this table and rightly follow the requirements for high cards in plain suits, you can bid four-card suits without getting into trouble. If, however, you bid four-card suits without outside strength, you will have trouble and plenty of it.

There is an interesting hand that shows the value of taking out certain suits in one's own hand and partner's hand. It is a hand in which the plain suits, you can bid four-card suits without getting into trouble. If, however, you bid four-card suits without outside strength, you will have trouble and plenty of it.

No score, rubber game. Z won the bid at four hearts. A led the ace and king of spades and then the queen of diamonds which was won in Y's hand with the king. How should Z now play the hand so that he can win four odd against any defense?

Solution: Z should take two rounds of trumps, thus eliminating the trump suit in his opponents' hands. He should then lead the ace of diamonds and follow with the six of diamonds, trumping in Y's hand with one of his remaining trumps. Y should now lead his last spade and trump in Z's hand with one of his three remaining trumps. In this way both Z's hand and Y's

NOTED DANCER LEARNS HOW TO POSE FOR "TELEVISION"

Ann Pennington talented dancer known to theatre goers everywhere in a pose the radio transmitted across the country.

Mortimer Stewart taught it to her beforehand so that she might appear before that large television transmitter at the right. This apparatus not

only broadcasts the voice but also gives the listener a view of the speaker every minute the power is on. Incidentally great strides are being made in this science with prospects of every radio set owner wanting a television receiver before long.

BY R. M. SHERRILL (Radio engineer)

Radio is playing an important part in the development of Canada's vast northland. Stations are becoming more numerous each year and more and more prospectors and mining companies go farther north. Radio is the only means of communication available to these men while in the north away from railways and telegraph lines.

Stations are of both the amateur special experimental license type and the private commercial. They are operated by the Dominion, Ontario Provincial and private companies—transacting every kind of business that is carried out over the telegraph lines in more civilized parts of the continent.

A number of mining companies operate their own stations in a similar manner. There is usually one station at a jumping-off point or at the city headquarters, with one or more stations in the field. These stations use standard commercial equipment of the Marconi company for short distance communication on wave lengths in the neighborhood of 200 meters.

Most of the stations in the north use short waves as these are the best means of communication in lands where the northern lights are quite active all year. They affect short waves less than the longer wave lengths and at the same time the apparatus needed is much more compact and lighter than that used for long-wave transmission. Canada will need more short waves for the future stations for that distant the stations being replaced by telegraph lines when the railways will come in.

Three Year Broadcasting Contract Signed

A three-year contract for radio broadcasting has been signed. It involves the Acoustic Products Corporation and the Columbia Broadcasting system and calls for a total of 156 hours at a cost of approximately \$1,000,000 for talent and station and wire facilities.

The program is to go out each Thursday evening and will consist of musical features.

French Radio Fans in Novel Set Competition

An interesting public radio competition was recently staged by officials of Bordeaux France. On a large open square entrants stood up their inscriptions, some on park benches, others on taxicabs or private automobiles. An aerial was put at the disposal of competitors and each in turn was given a couple of minutes in which to demonstrate what his receiver could do.

Arc Transmitter Fails to Bother Short Wave Sets

Tests conducted at the Navy's high power radio station at Annapolis indicated that the main arc antenna did not seriously interfere with the transmission of a high-frequency net installed at the Annapolis station.

It had been feared that the arc would tend to "chock" the high-frequency transmitter calibrated to 8,570 and 17,140 kilocycles. The results of the tests were reported by the Navy stations at San Francisco, San Diego, Balboa, San Juan, and Great Lakes. All stations except Great Lakes received the test signals with "fair" to "good" strength.

The tests were made with a view to deciding whether two new transmitters should be installed at Annapolis or Arlington. It has been decided to assign one to each station. (Copyright, 1928, by The Bonnet-Brown Corporation, Chicago)

RADIO QUESTIONS ANSWERS

Q—H. C. P. says: "I have rigged up 2 UX171A tubes in a push pull circuit. Something is wrong however as

about all I can get from the set is a strong howl, and if I touch the plate terminal on the socket a small spark will jump to my finger. Can you suggest what is wrong?"

Ans.—From your description it is likely that the push pull circuit is oscillating. If this is so try interchanging the plate leads to the two tubes.

Q—S. W. M. says: "I am having trouble adjusting my B battery eliminator so that I can get sufficient voltage. When I check the voltage with a meter it reads about 45 volts instead of 100. The meter checks ok on a B battery. Is the trouble in the transformer?"

Ans.—If you are not using a special high resistance volt meter it may be that the eliminator is ok. An ordinary voltmeter that checks on a battery may read but a fraction of the voltage produced by the eliminator. The meter should have a resistance of at least 100,000 ohms.

Q—U. E. N. says: "I have two UX 226 AC tubes but do not live in an AC house. Will these tubes work on dry cells?"

Ans.—The tubes will work on DC but may not be satisfactory on dry cells. This is because the UX226 draws a heavy current which would soon drain the dry cell.

BY DR. ARTHUR L. FORSTER

Approximately one-half of all fighters who follow the profession of pugilism long enough develop what fight promoters and sports writers call "Punch Drunk." The ring fans recognize the symptoms early and fighters afflicted with the malady are said by them to be cuckoo, goofy, cutting paper dolls or slug nutty.

Punch drunk as a disease entity is not described in medical literature but has been known for years among the devotees of pugilism. Even the early symptoms of the condition are so familiar to the denizens of the gallery that they note them in a fighter as soon as he gets into action in the ring and start shouting "cuckoo" at him.

The disorder probably received most widespread notice on the occasion of Gene Tunney's recent exchange of the boxing ring for the wedding ring when he made the following statement: "While in training for my bout with Dempsey I was sporting and went in to a clinch with my head down, something I never do. I plunged forward and my partner's head came up and butted me over the left eye, cutting and dazing me badly. Then . . . he stepped back and swung his right against my jaw with every bit of his power. It landed flush and stiffened me where I stood. That is the last thing I remembered for the round by knocking the man out."

Caused His Retirement

"From that incident I've been my desire to quit the ring forever the first opportunity that presented itself. But most of all I wanted to quit the game that had threatened my sanity before I met with an accident in a real fight with six-ounce gloves that would permanently hurt my brain!" Tunney so said that it was forty-eight hours before he knew who he was and that he was not entirely normal until the seventh round of his fight with Dempsey.

Dr. Harrison R. Martland has made the first scientific contribution to medical literature on the subject of punch

drunk. His theory assumes that the basic lesion in the brain is due to many small hemorrhages brought about by repeated head injuries.

Punch drunk, as he says, most often affects the slugging type of fighters who are usually poor boxers and who take considerable head punishment in exchange for which they hope to deliver a knockout punch. It is also common among second rate fighters used for training purposes, who are often knocked down several times in one day. Of course, the condition is not confined to such fighters—it has affected some of the top-notchers in the pugilistic world.

Wobbly Legs An Indication

The early symptoms of punch drunk generally appear in the legs. There may be only an occasional and very slight dropping of one foot or leg in walking. Or there may be a little unsteadiness in gait or uncertainty in equilibrium. These defects may not seriously interfere with fighting and are noticeable only when the man walks to his corner.

Many cases remain mild. Others develop a pronounced dragging of the leg a general slowing down in muscular movements, hesitancy in speech nodding motion of the head and tremors of the hands. These men are finally compelled to leave the ring. In severe cases the man may develop a peculiar tilting of the head, pronounced dragging of one or both legs and all the signs of shaking palsy. Or he may develop a backward dizziness and deafness. Marked mental deterioration may set in requiring commitment to an asylum.

While some prominent nerve specialists have said there is no such thing as punch drunk, I agree with Martland when he says that the opinion of shrewd men who make a living by observing the physical fitness, actions and characteristics of the professional fighter is perhaps more substantial than the opinion of medical experts.

Moreover the condition should receive careful scientific study as it is after all undoubtedly part of that large group of cerebral disorders recent studies of which throw our old ideas of concussion of the brain into the discard.

QUESTIONS AND ANSWERS

Reducing Tablets
Mrs. C. D. writes: "Will you please tell me whether it is safe to take (—) tablets for reducing? Are they effective?"

REPLY

The following taken from the A.M. A Journal (Nov. 3, 1928) will answer your question:

"Reports have come in to the Journal at various times of the harmful effects that have followed the indiscriminate use of (—) the symptoms being those of thyroid intoxication. This is not to be wondered at when it is known that the instruction for the use of (—) result in two grains of desiccated thyroid being taken daily by women who are wholly ignorant of the potency of thyroid and who naturally assume that products sold for self-medication are quite safe to use."

Ships with berth cabins and public rooms designed on straight lines, like those on shore are less likely to cause seasickness than those where slightly curved lines prevail. At least such seems to be the experience of a British railway company with two cross-channel vessels, exact duplicates, except that one was constructed in the ordinary manner with cambered decks state-room bulkheads and other partitions following the form of the ship's sides while the other had flat decks and partitions at right angles throughout.

CONTINUATION OF BUSINESS CONDITIONS

(Continued from page 3)
automobiles containing 328,000 passengers entered the province, as compared with 76,000 automobiles containing 266,000 passengers in the twelve months of 1927.

In general the situation in British Columbia is highly satisfactory and the immediate prospects are favorable for a continuation of prosperity.

Town and District Topics

BORN—To Mr and Mrs T. N. Withnell, of Heath, on January 5th a son.

BORN—To Mr and Mrs J. Stinert at the Wainwright Municipal hospital on January 15th, a girl.

Mayor Forster is away east for a few days this week attending the Chevrolet dealers convention. Coun. Pefrie is at the helm during the mayor's absence.

Mrs A. MacDougall, of Edmonton, is visiting Mrs D. Davison this week to attend the funeral of the late Mrs. MacLeod.

Times are just right; if they were any better there would be no work for the bill collectors! Yes, times are just right for you to put on your storm ash and haul your coal before it gets too cold. You will find a good supply of both at the Atlas yard. Joe Welch, mgr.

Mr E. (Bud) Cotton is away to St. John's N.B., in charge of three buffalo from the park here, these animals being destined for Italy.

A couple of valuable properties which the Town has on hand are being advertised for private sale in this issue. See page five.

We learn that the voting on the question of local option, which was registered at Edgerton on Saturday resulted in 49 drys to 41 wets. We understand that a two-thirds majority is required to carry the vote.

A survey of current publications places the Family Herald and Weekly Star of Montreal in the lead for variety and quality of reading. Always recognised as a steady guide and counselor to the farmer the survey proclaims it almost as equally popular in urban homes.

Money Talks! That's why Dad is using signs since Christmas! Sign your insurance application and stop taking chances on fire, accidents and sickness. See Joe Welch or phone 57.

As will be seen from his big advt. in this issue Mr T. Blason is closing out his stock of farming equipment and supplies. He is offering some great bargains, too, and no doubt the thrifty will take advantage of this sale.

It should be noted that the Old-Timer's dance which was scheduled for Friday next has had to be postponed until Tuesday evening January 22nd.

We are sorry to learn that Mrs H. Kemp suffered a slight stroke on Sunday last, and express wishes for her speedy and complete recovery.

A number of the Wainwright L.O.O.F. members journeyed to Chauvin, where in addition to conducting the installation ceremonies on the new officers, assisted in conferring the second degree on a nice class of candidates. A splendid supper was enjoyed before the long drive home.

Mr Dave Wilson of Edmonton was a visitor to town for a couple of days last week in connection with his office and Scribe of the Grand Encampment L.O.O.F.

On Monday next a boxing match is being staged at the theatre, and no doubt the followers of this sport will be out in full force.

We are sorry to note that Mrs H. C. Wallace who was on the sick list last week is not much better.

Among the visitors to town last week was Mrs J. Forrest, who was formerly a resident here.

How is the new house coming along? Fire, replied the other I got the roof and the mortgage both put on today. Joe Welch can arrange these matters for you.

Owing to the increased attendance at the kindergarten school it has been found impossible to accommodate all of the little ones and "half-time" instruction is being resorted to to overcome the difficulty.

During the big wind storm last week when it was figured that the velocity of the blast at times reached some forty miles an hour, no less than five new derricks erected in this field last fall were blown to the ground.

A report of the big annual "At Home" of the Oddfellows will appear next week.

"The Steep to Conquer" the famous comedy by Oliver Goldsmith is being presented in town by the St. Luke's Dramatic club on January 21st and tickets can be obtained now and the seats reserved.

Don't forget to take home a load of Black Diamond Coal from the Atlas yard the next time you are in town as you will need it to keep you comfortable these cold nights.

Mr James Booth, who arrived from Ontario last week is here on a visit to his nephew Mr. Robert Reid.

Quite a sensible idea was carried out by the Council when ashes were distributed on the sidewalks after the recent sudden thaw and freezing which made navigating dangerous indeed.

CHANGE IN CLASSIFIED ADVERTISING RATES

In common with hundreds of weekly newspapers throughout the Dominion The Star is, at the beginning of this New Year, inaugurating a new policy which will reduce the rates charged for classified advertisements in order to make this class of publishing more serviceable to our readers.

Owing to the expense of book-keeping for trivial accounts, ALL classified advertising MUST be paid for when ordered unless advertiser has a regular ledger account.

The new rate will be Two Cents per word for first insertion, with a minimum charge of Fifty Cents. If charged to account the cost will be Three Cents per word (minimum charge 75c). Three insertions for the price of two. Send cash with order and save money!

SHOES REPAIRED FOR NEW WEAR

It is not necessary for you to go to a shoe store for a new pair which will cost you a lot of money. You might just as well let us have that worn pair and renovate it for a very small amount. They will look just as well and wear just as long. We put good material and workmanship in our repair work. And we can save you a lot of money.

KARMAN'S FOOTWEAR
2nd Ave. Wainwright

While driving home from town last Friday Mr W. Jackson had a narrow escape from a serious accident, the car skidded on the icy road at Hartman Mills' corner and a broken wheel and other damage was done to the car although luckily no one was injured.

The face-rock brick for the new Federal building is being unloaded and the work keeps merrily along despite the unfavorable weather of the past few days.

A shower for the bride was given at the home of Mrs Fred Spence last week end, when Mrs K. I. Kenney was the guest of honor. A large number of this popular young lady's friends were in attendance, and a long list of useful presents was her portion.

Miss Barford arrived last week from her home in England on a visit to her aunt Mrs Chas Horn for a few days.

Dr and Mrs Courleir and family have now returned from a couple of weeks vacation. During their absence they visited relatives at both Edmonton and Revelstoke, B.C.

The fall of snow came just at the right time, as several farmers have been holding their grain until January 15th to gain the two cents a bushel which the pool pays for farm storage. This relieves some of the fall congestion of shipments to the east.

Both Bob Beattie and Johnny Winters who are patients at the hospital are progressing very nicely.

It is not necessary to run a "hot dog" stand to hand out a lot of bologna. Just Black Diamond coal at the Atlas yard, and get the best fuel there is. Joe Welch, mgr.

Here and There

More than 11,000,000 tourists visited Ontario during 1928 and spent about \$100,000,000 according to figures issued at the Provincial Parliament Building in Toronto the other day. This is an increase of over 20 per cent over the record made last year.

Production of tobacco in 1928 totalled 49,976,375 pounds from 43,138 acres. Of the total output the Province of Ontario accounted for 22,665,850 pounds from 22,654 acres; Quebec 8,546,325 pounds from 19,358 acres and British Columbia 184,204 pounds from 116 acres.

Elmer Catherswood, who distinguished himself as an athlete representing Canada at the Olympic games in Amsterdam in August, has been honoured by the Canadian Pacific Railway as a station on the recently constructed Rosetown-Perdue branch has been named "Catherswood" after her.

Twenty-five years ago Thomas Hubert, now employed as a bar-tender on the C. P. R. between Ottawa and North Bay, lost a valuable silver watch while working in a field near Pembroke. The other day a glittering object was turned by a plough. It was Hubert's watch, the glass broken and the hands gone, but still retaining a brilliant lustre. The field had been ploughed many times since it was lost.

Toronto is preparing to receive the largest number of prominent baseball figures ever to be in Canada at one time. The National Association of Professional Baseball Leagues will meet there shortly and every baseball club in America will be represented. Judge Landis will be on hand, and the final attendance is expected to amount to over five hundred delegates coming from points as far as Pueblo.
